My Information

Michal Staniaszek

September 11, 2014

1. I studied my BSc in Computer Science at the University of Birmingham in the UK, spending one year at Keio University in Tokyo. Now studying Systems, Control and Robotics at KTH following the Robotics and Autonomous Systems track as an international masters student.

2. I have Machine Learning this period and Machine Learning Advanced Course next period. I'm not sure exactly how much work each of those is, but I should be available to do as much work as is necessary.

3. My best quality for teamwork is my willingness to work a lot to make sure that they work as intended (or at least close enough).

4. My worst quality for teamwork is my perfectionism in terms of code structure and so on. I like for code to look nice and I often spend too much time on this instead of implementing stuff that just works. I'm not sure if this is good or bad.

5. The part of the project that is most interesting to me is probably the programming part. In particular I want to try and do things so that it's easier to integrate all of the different modules at the end of the project.

6. Cycling, watching stuff on YouTube, reading (SciFi), computer games, music (post-rock, modern classical)
